Mensen krimpen vanaf hun 30ste levensjaar zo'n 1,25 centimeter per 10 jaar.
De perceptie is dat Anti Stress in 3 minuten massages herstel & groei bevorderen, onder welke invloed de hier weergegeven groei (t.o.v. gemiddelde krimp p. jaar) 0,66 cm.
(middag) / 0,41 cm. (avond) = 0,125 cm. (10% v. 1,25 cm.) = 0,785 cm./ 0,535 cm. in 11 maanden is.

De verschil in lengte vanaf week 5/2016 t/m week 21/2016 van Jolanda de Vries is 0,46 cm in de ochtend, 0,55 cm in de middag en 0,35 in de avond. Dit is gemiddeld 0,453 cm lengtegroei in 22 weken, terwijl volwassenen 0,125 cm per jaar zouden krimpen!!!

De hypothese is dat de groei door kan gaan tot de in het DNA vastgelegde maximale lengte is bereikt, en dat er een verband kan bestaan tussen de toevoeging van
Anti Stress in 3 minuten massages aan leefstijl, gezondheid en functioneren van volwassenen.
Jolanda de Vries - Marsten Massages, Haarlem. Tel. 06-23524708.
